

# Rock Shox Solo Air Rider Weight v. Pressure Guide

A sticker on a Rock Shox Solo Air fork provides a guide for rider weight versus air pressure. The sticker is divided into two columns for 80mm and 100-120mm air settings. It lists rider weight ranges in pounds and kilograms, and corresponding air pressure ranges in psi. A warning at the bottom states 'do not exceed 265 psi'.

SOLO AIR AIR SPRING GUIDE ↑	RIDER WEIGHT		AIR SETTING	
		80mm	+	100-120mm
	< 140 lb. (< 63 kg):	90-110 psi		50-70 psi
	140-160 lb. (63-72 kg):	110-125 psi		70-85 psi
	160-180 lb. (72-81 kg):	125-140 psi		85-100 psi
	180-200 lb. (81-90 kg):	140-160 psi		100-120 psi
	> 200 lb. (> 90 kg):	175+* psi		135+* psi
		*do not exceed 265 psi		*do not exceed 200 psi
